

About Signia

Signia is one of the leading hearing aid brands in the world. Our goal is to enhance human performance through iconic innovations that shape prescription audio solutions. We refuse to accept hearing loss as a limitation. It's not about correcting a loss, it's about gaining an edge. Not just performing, performing brilliantly. Not just hearing again, but hearing better than ever. Hearing every word, beat, and breath. With Signia, you can Be Brilliant.

Be Brilliant™

EarWear 3.0

EarWear 3.0

Why new EarWear

Our new EarWear 3.0 offers a higher physical fit rate, improved cosmetics and better retention

miniReceiver 3.0 Cable Bending 10 / 10 fit correctly - out of the box

- Higher physical fit rate**
Softer eartips and smaller receivers allow deeper insertion at high comfort, even into small ear canals.
- Cosmetically appealing**
Improved cable/tube bending and in-ear position ensures a closer fit on the ear, making it less visible. Every variant is available in the lengths 0-4.
- Better retention**
A special bending of the cable/tube and its outlet locks the acoustic coupling reliably into the ear canal, with no lateral migration and no need for an anchor.
- New eartips and new sleeves**
Compatible with miniReceiver 3.0 and ThinTube 3.0 and easier for your clients to exchange (compared to click domes).
- The sleeve portfolio has been extended by a Power option - ensuring optimal acoustical coupling also for severe hearing losses. Compatible with ThinTube 3.0 and miniReceiver 3.0.
- Smaller hearing aids**
The introduction of a substantially smaller plug allows for smaller RIC designs overall.
- Improved usability**
The improved interface makes the new Eartips & Sleeves much easier for consumers to exchange (compared to click-domes).

Acoustical and physical fitting performance of miniReceiver 3.0 portfolio

EarWear 3.0

New eartips and sleeves

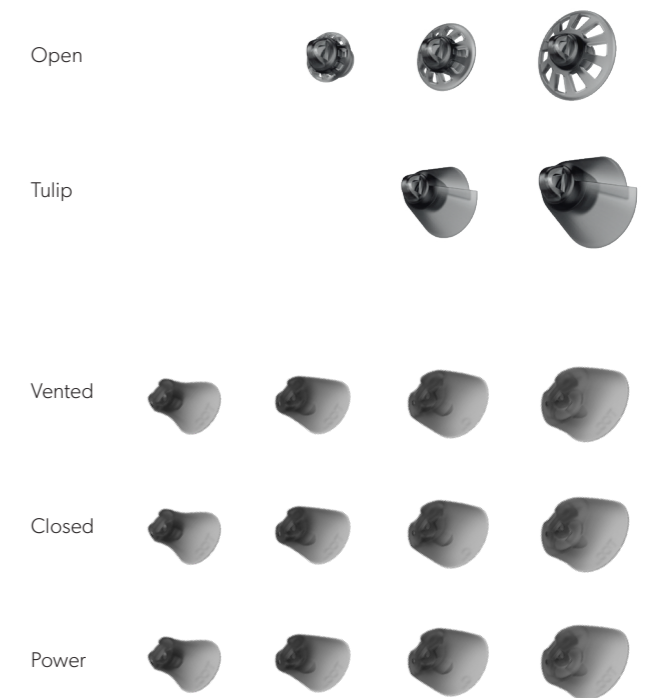

This versatile new range is suitable for the vast majority of ear anatomies and hearing needs

Soft eartip noses allow for deep insertion with high comfort - also into small ear canals

The new Power Sleeve 3.0 expands the acoustically highly reliable sleeve to also offer a fully closed option.

Secure, proven design makes Eartips 3.0 and Sleeves 3.0 much easier for consumers to exchange.

All Earwear 3.0 items can be used together.

EarWear 3.0

New receivers and thin tubes

The new miniReceiver 3.0 and ThinTube 3.0 use the same eartips and sleeves for maximum simplicity and the same cable/tube geometry for best cosmetics

Both ThinTube 3.0 options offer proven better retention, comfort, usability and physical fit rate

The new 1.4mm-width PowerTube also delivers a cosmetically appealing solution for more severe degrees of hearing loss.

Cosmetics

New tube/cable bending and in-ear position improves cosmetics of tube/cable on the ear. 25% size reduction of plug system allows for smaller hearing aids.

Retention

Improved bending of tube/cable + outlet locks the acoustical coupling reliably into the ear canal, prevents lateral migration and makes concha-locks redundant.

EarWear 3.0

Tools and starter kits

Starter kits are available for each solution: Eartips 3.0, ThinTube 3.0 and miniReceiver 3.0

Each kit includes specific items required for that type of EarWear 3.0. These include:

- Measurement gauge to ensure a perfect match for miniReceivers and ThinTubes
- Matchbook containing 8 Wax Guard 3.0 NanoCare
- 10-pack of new one-size-fits-all Concha Locks 3.0
- Optional tool for exchanging eartips
- Tool to press out the receiver from a custom eartip

You also receive instruction manuals on how to use EarWear 3.0, covering everything from eartips and sleeves to attaching or removing ThinTubes or miniReceivers to exchanging earmolds or WaxGuards.
