Unleash the power of conversation

With the Pure Charge&Go IX family, the Motion Charge&Go IX family, and Styletto IX

Pure Charge&Go IX family | Motion Charge&Go IX family | Styletto IX

Meet the world's first hearing aid platform with a multi-stream architecture capable of accurately pinpointing multiple moving speakers in real-time conversation.

Improved hearing is about more than just sound amplification. It is about empowering individuals to immerse themselves in their surroundings, create meaningful connections, and cherish every moment of life's experiences.

Leveraging our profound understanding of dynamic conversations, including the head movements of the wearer and changing positions of speakers, we crafted Signia Integrated Xperience. This groundbreaking technology ensures uninterrupted conversation engagement in noise, addressing a critical challenge many hearing aid wearers face.

Our commitment is to support wearers in leading active lives, unshackled from the limitations of traditional hearing aids and free to contribute and foster deeper connections.

Experience the transformative power of real-time, dynamic conversation enhancement with Signia Integrated Xperience.

Signia app – You're in control

Let the easy-to-use Signia app empower you on your hearing journey:

Be in control – adjust the volume via remote control and tailor settings to your personal preferences with the Signia Assistant.

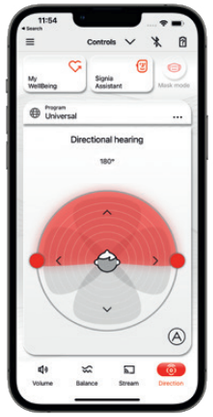

Be confident – connect with your hearing professional via TeleCare and rely on quick answers in easy how-to videos with the Signia Assistant.

Be active – keep track of your physical activity and hearing activity with My WellBeing.
