

Signia's Integrated Xperience provides a revolutionary three-stage process that puts conversation first.

#### ANALYZE

Analyzes 192,000 data points every second to authentically reflect real-life conversations

#### AUGMENT

Leverages the comfort and clarity of split processing to provide an immersive conversational experience without distractions

#### ADAPT

Focus streams adapt 1,000 times per second to ensure wearers can fully engage in group conversations

## Unleash the Power of Conversation

Signia Integrated Xperience (IX)  
with RealTime Conversation Enhancement

### Group Conversation in Noise is Difficult...

- Group conversations in noise are the biggest unmet need for people with hearing Loss<sup>1</sup>
- Can lead to frustration, isolation and ultimately withdrawal<sup>2</sup>
- They miss out on the moment, we miss out on their contribution to the conversation

<sup>1</sup> MarkeTrak 2022: Insights into the Evolving Hearing Market: Hearing Aid Benefit and Satisfaction Results from the MarkeTrak 2022 Survey: Importance of Features and Hearing Care Professionals - PMC (nih.gov) Picou, (2022).  
<sup>2</sup> Impact of Hearing Loss on Daily Life and the Workplace - Hearing Loss - NCBI Bookshelf (nih.gov)

Benefits of RealTime Conversation Enhancement:

A comfortable, immersive conversational experience without distractions

Access to multiple speakers via the world's first multi-stream architecture<sup>1</sup> with speech that pops above the surrounding sound

Keep up and contribute to the conversation

95% of wearers have better speech reception with RealTime Conversation Enhancement than without.<sup>2</sup>

1 Number of focus streams varies per technology level.
