

Unleash the Power of Conversation

Signia Integrated Xperience (IX)
with RealTime Conversation Enhancement

signia

Group Conversation in Noise is Difficult...

- Group conversations in noise are the biggest unmet need for people with hearing loss
- Can lead to frustration, isolation and ultimately withdrawal
- They miss out on the moment, we miss out on their contribution to the conversation

Signia's Integrated Xperience provides a revolutionary three-stage process that puts conversation first.

ANALYZE

Evaluates 192,000 data points every second to build a picture of the listening situation and to understand the environment and conversation needs

AUGMENT

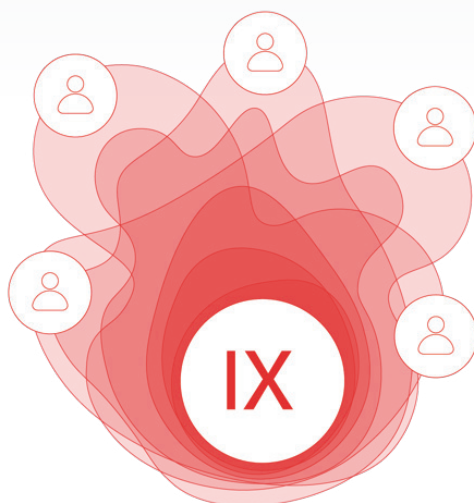

Boosts the voices of all the people in the conversation, helping the wearer to hear them clearly while staying immersed in their surroundings

ADAPT

Updates 1,000 times per second, allowing it to seamlessly adjust in real time as the conversation moves and shifts, ensuring the wearer is always part of the action

86% performed better with Signia Integrated Xperience versus a key competitor in a noisy group conversation.*

*Visit signia-pro.com/en-us/claims-data for more details.

Benefits of RealTime Conversation Enhancement*:

A comfortable,
immersive
conversational
experience without
distractions

Access to multiple
speakers via the
world's first multi-
stream architecture¹
with speech that
rises above the
surrounding sound

Keep up and
contribute to the
conversation

*RealTime Conversation Enhancement is not available in all styles and performance levels.

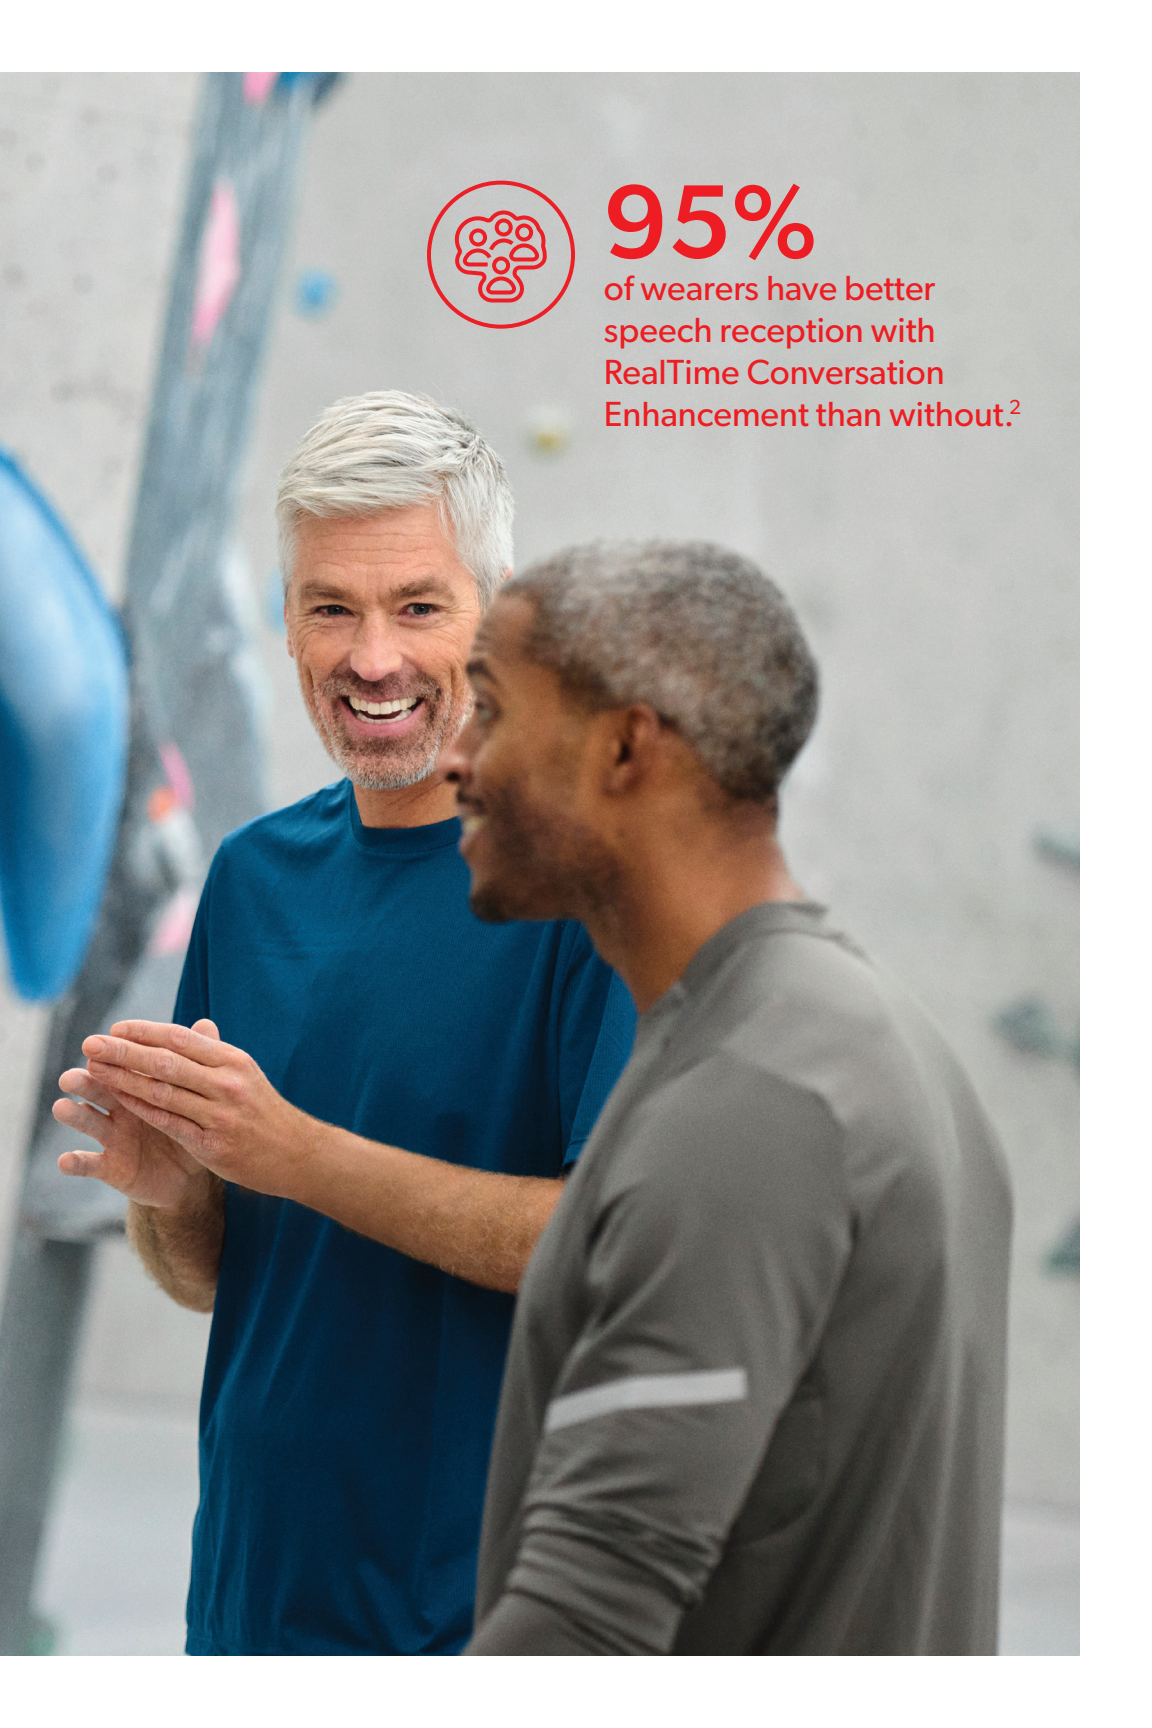

1. Number of focus streams varies per technology level.

2. Visit signia-pro.com/en-us/claims-data for more details

95%

of wearers have better
speech reception with
RealTime Conversation
Enhancement than without.²

Bring everyone into the conversation with Signia IX

Signia now offers the most up-to-date, inclusive device range with industry-leading speech processing technology...

Connectivity

Signia is the only manufacturer to offer Bluetooth® Classic, MFi, ASHA, and LE Audio connectivity

Power

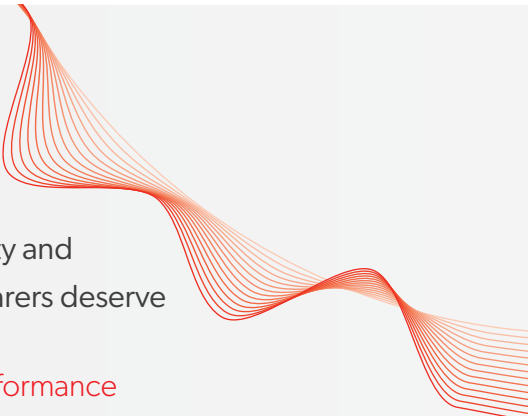

Fully rechargeable BTE family for all levels of hearing enhancement — including the longest battery life in a rechargeable Super Power BTE hearing aid — powered by our transformative RealTime Conversation Enhancement technology

Expanded Access

Signia expands access to hearing care by offering unique, discreet, and traditional hearing aids with advanced technology meeting people where they are in their hearing journey

Combined with the connectivity and cutting-edge features your wearers deserve

Future-proof connectivity & performance

With Signia, you give your patients the chance to stay connected with the future of hearing care with a variety of connectivity and performance options, including:

- Bluetooth® Classic
- Made for iPhone (MFi)
- Audio Streaming for Hearing Aids (Android ASHA)
- LE Audio
- StreamLine Mic offers remote microphone and Bluetooth Classic connectivity
- TV Sound provides Dolby® Digital enhanced television-watching experience
- Firmware updates to enhance performance

Own Voice Processing 2.0*

Own Voice Processing (OVP) promotes hearing wellness

Contribute comfortably — OVP 2.0 ensures the wearers own voice is comfortable and provides a more pleasant and stable sound of both their own voice and surroundings.

Boost Communication — 75% of participants reported increased communication when using OVP.³

Signia Assistant*

The 24/7 hearing companion

Signia Assistant is the only live AI-driven companion that empowers the wearer to manage their own streaming and sound quality preferences.

* Not available in all styles and performance levels.

3 Høydal EH. A new own voice processing system for optimizing communication. Hearing Review.

Signia BCT IX

The perfect choice for your patients

What makes this the perfect choice for you and your patients? Simple and effective hearing care thanks to universal connectivity, an enhanced user experience, and revolutionary sound processing.

Universal connectivity

- Easily connects to 99% of devices including cell phones, tablets, laptops & TVs
- High quality audio-experience streaming music, calls and entertainment
- Stay connected on the go and answer/end HandsFree calls directly from the hearing aid
- Integrated telecoil for better hearing in challenging environments supported by a loop system
- TV Sound provides Dolby Digital enhanced television-watching experience

Revolutionary Speech Processing

- Our RealTime Conversation Enhancement delivers 24% better speech understanding in noisy group conversations than leading competitors*
- The only Bluetooth classic compatible hearing aid with ultra-fast, always-on NFMI e2e wireless 4.0 allows hearing aids to track and enhance multiple speakers in noisy environments.

Enhanced user experience

- Industry leading up to 36 hours of runtime — including 5 hours of streaming
- Convenient visibility window to easily identify the serial number and performance level

Silk Charge&Go IX

The only thing that changes is your hearing

Silk Charge&Go IX – an innovative completely-in-canal (CIC) hearing aid that pairs exceptional sound quality with unmatched discretion.

Power through the day

The convenience of a rechargeable battery runtime of up to 28 hours for all day listening — plus the hassle-free wireless charging case conveniently charges the hearing aids up to 4 times on the go

Binaural OneMic Directionality

The only rechargeable instant-fit CIC device that offers Binaural OneMic Directionality to focus on a speaker in noisy listening environments

Unmatched discretion

The soft, textured surface avoids reflections for added discretion

Immediate fit, immediate impact

The quick, satisfying experience of a ready-to-wear CIC, the Silk Charge&Go IX's small, snug design is discreet and it can be worn immediately

Control with the app

The user-friendly Signia app and miniPocket remote control allows patients to fine-tune their hearing aids to their unique needs for personalized control anytime, anywhere
